

Deutsche Gesellschaft für
Kristallographie

**AK20 Workshop:
“Crystallography in Materials
Science: Future Developments
& Career Options”**

October 04 – 05, 2021
Online-Workshop

**Deadline for registration September 15,
2021**

Organized by:
Hilke Petersen and Claudia Weidenthaler

**Max-Planck-Institut
für Kohlenforschung**

Workshop Description

The workshop is intended for graduate students, PhD students, and young scientists active in solid-state research (chemistry, physics), geosciences, crystallography, and materials science.

Aim of the school is to give an overview of different future developments in research and career perspectives for young researchers and graduates in the field of crystallography.

During the workshop, the following topics will be addressed:

Method development at large research facilities:

- Hot topics
- Method development
- New techniques

Career perspective for young graduates in:

- Academia, industry, public service and at large research facilities

The participants are encouraged to present their work as lightning talks in small sessions. Individual problems will be discussed.

Speakers

Bernd Hinrichsen (BASF Ludwigshafen)
Ariane Friedemann (Polizei Bremen)
Mirijam Zobel (RWTH Aachen University)
Martin Etter (Petra III DESY Hamburg)
Anatoliy Senyshyn (FRM II Munich)

Location and Time

October 04, 2021, 10:00 – October 05, 2021, 16:00
The workshop will take place as an Online-Meeting via ZOOM.

Workshop Fees

The online meeting is free of charge.

Language

The official language of the workshop is English.

Information

Additional information will soon be available at:
<https://www.kofo.mpg.de/events/28835/2552>

Registration:

Please send an email for registration:
weidenthaler@mpi-muelheim.mpg.de
If you intend to give a presentation, please also send the title of your contribution.
The workshop is limited to 50 participants.
